

OneAdvisor 800 – Wireless

Smart Access Anywhere (RA06, RA44)

OneAdvisor 800 - Smart Access Anywhere

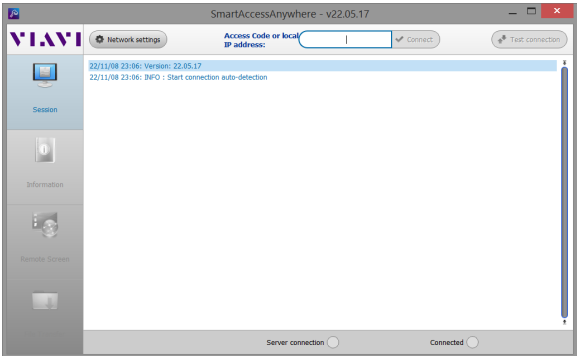

This procedure describes the process to setup the OneAdvisor 800 with Smart Access Anywhere for radio analysis modules SPA06MA-O or RA44MA-O.

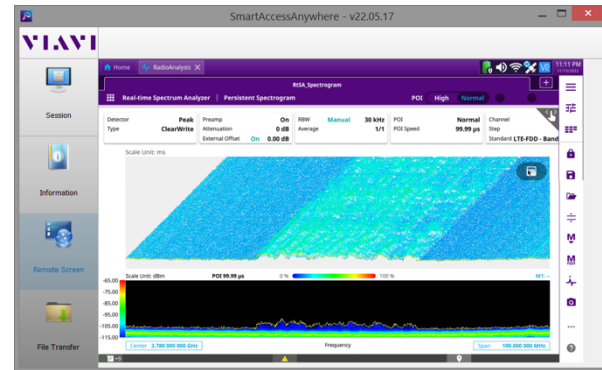

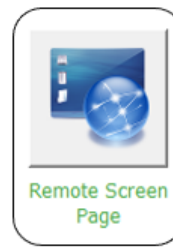

OneAdvisor 800 - Smart Access Anywhere Setup Process:

Step	Action	Description
1	WiFi Connectivity: To setup the OneAdvisor 800 WiFi network select: - {Home} - {System} - {Network} - {Wi-Fi} - Enable Wireless Adapter - Select the SSID from the list and enter the corresponding password.	The flowchart shows the navigation path: Home → System → Network → Wi-Fi. Below this, a box indicates 'Enable wireless adapter' and another box says 'Select the corresponding SSID and Password'. Below the flowchart is a screenshot of the 'System > Network' interface. It shows 'Enable wireless adapter' checked, a list of available networks (ELABE, jibool, FlyingSolo, xfinitywifi, XFINITY, AP_F22210003, NETGEAR48-5G_RPT, MPD-Guest, DIRECT-96-HP Officejet 5200, Other...), and network details: IP address: 10.0.0.57, Subnet mask: 255.255.255.0, Gateway: 10.0.0.1, DNS server: 75.75.75.75. The status is 'Associated'. WiFi Network Configuration WiFi Connection
2	Smart Access Anywhere Setup: - {System} - {Remote} - Smart Access Anywhere, {Connect} Note: Provide the Access Code to the remote entity to grant remote control access	The flowchart shows the navigation path: System → Remote → Smart Access Anywhere. Below this, a box contains the text 'Smart Access Anywhere Access code: 889faf31e3'. Smart Access Anywhere Setup Smart Access Anywhere Connection
