Note: 1. SFP/SFP+ Optical interface recommendations for CPRI and OBSAI line rates as per document CPRI Interface Specification V5.0 and OBSAI RP0 specifications Version 4.2. VIAVI T-BERD/MTS product line supports RX/TX rate select functionality implemented for SFP/SFP+ optical modules that are Rate Selectable as per SFF-8079, SFF-8431 and SFF-8472. Compliance to a particular optical standard is based on the manufacturer's datasheet, not the rate configurability of the optic.

2. For the MSAM2 (C0400-V2, C0404-V2, C1010-V2), SFP+ module support requires a SFP+ PIM.

3. These modules have been tested with the designated platform. They are not sold by VIAVI Solutions.

4. Requires use of appropriate CFP2 adapter from VIAVI Solutions. CFP2 to CFP4 adapter required for support of CFP4 modules. CFP2 to QSFP28 adapter required for QSFP28 modules.

5. When used on the CSAM with CFP2 to QSFP28 adapter, some circumstances may require that CDR bypass is enabled for the Tx and Rx side under expert mode settings for proper operation.

6. This optical reach requires forward error correction (FEC) in order to meet BER requirements. Depending on which standard is applicable, pre-FEC BER can be up to 5×10^{-3} .
