

Meet Your New Job Manager

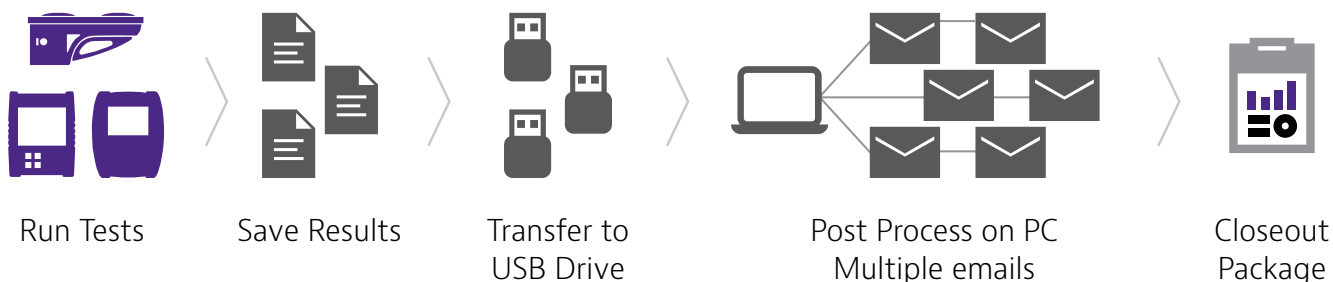

VIAVI StrataSync for Cell Site Contractors

Streamline test results collection with StrataSync cloud-based test data management.

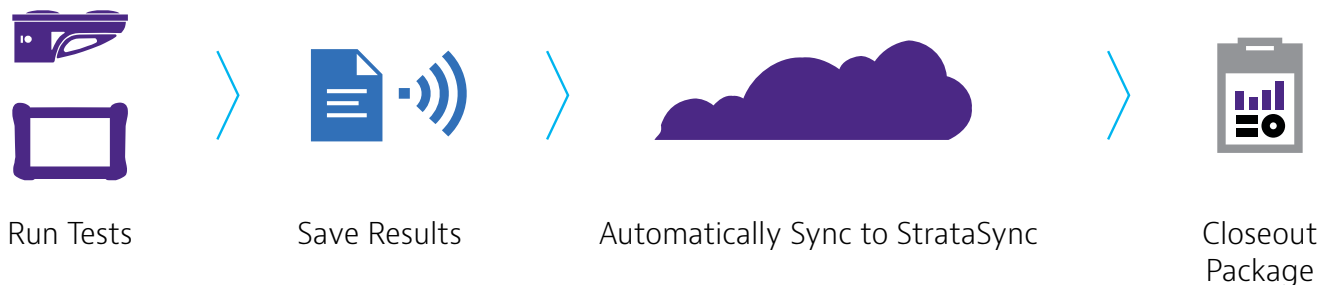

Spend time doing the job rather than proving you've done the job. Typical installation tests include fiber inspection, coax cable, OTDR, and antenna alignment.

The Old Way

Lengthy, error-prone, manual process • Delays close-out

A Better Way

**Eliminating emails, USB sticks, and PC post processing reduces costly errors
Never revisit a site due to a lost test report again • Review results and create
the closeout package while the team is still on site**

VIAVI OneAdvisor 800, 3Z RF Vision, Job Manager and StrataSync make it easy for easy for cell site contractors to get in, get out and get paid.
